Requirements for the reference list

The reference list in Russian is drawn up in accordance with the requirements of the Higher Attestation Commission of the Republic of Belarus (GOST 7.1-2003).

The cited literature is listed in the order it is mentioned, references in the text are indicated with an index number in square brackets (e.g. [1]).

References to unpublished works are not allowed.

In all cases when the cited material has a digital object identifier (DOI), it must be indicated at the very end of the bibliographic reference.

References to research works, regulatory documents (standards, technical regulations, sanitary, veterinary, building codes, fire and industrial safety codes, etc.), normative legal documents (laws, decrees, bylaws, orders, etc.); codes; patents; reports and other documents should be indicated not in the reference list, but as footnotes.

Example:

[1]Тарасова В. И. Политическая история Латинской Америки : учеб. пособие. М., 2006. С. 305.

Requirements for References

The list of references written using the Roman alphabet (“References”) are listed after the reference list in the following way:

authors (transliteration) (all authors of the publication are indicated);

translation of the article title into English;

name of the Russian-language source (transliteration), then the translation of the source name into English: if there is no established name in English, it is indicated in square brackets [] (see section 5 in the table); if there is a used name in English (see section 3 in the table), it is put after the sign “=”.

publishing information with abbreviations and notation in English (a comma-separated list containing city, publisher, year, number of pages (for a magazine: year, issue, pages).

‘(in Russian)’ shall be written at the end of the description of the Russian-language source.

When describing References, the type of publication (textbook, study guide, teaching aid, workshop, dissertation, abstract) is not indicated.

English-language sources are fully repeated (in English).

Transliteration of Russian-language names is performed according to the BSI standard (http://translit.net/ru/lc/).
